

430

Small Character Ink Jet Coder

- ▲ The 430 is for industrial users who need a competitively priced coder whilst demanding the latest in ink jet technology. The 430 incorporates a new patented printhead design which delivers class leading reliability and print quality.
- ▲ Push button stop/start, with automatic printhead cleaning
- ▲ High quality printing of up to 3 lines of text, barcodes and logos
- ▲ On-screen generation and editing of graphics and logos through an easy-to-use interface
- ▲ Range of quick drying low environmental impact inks
- ▲ Easy to operate and maintain
- ▲ Storage for up to 25 messages

430 Technical Specification

Standard Features:

- 1 to 3 lines of code
- Automatic print head cleaning during start up and shut down
- Print head cleaning activated by power out
- Simple push button operation
- Local language message editing and display
- 25 message memory
- On-screen logo editor
- Password protection system
- Sequential numbering
- Continuous printing
- Current and expiry time and date coding
- 3 metre print head umbilical

Line Speed:

Up to 4m/second

Fonts:

5 x 5, 7 x 5, 9 x 6, 16 x 11, 24 x 17

Print Height:

1 to 10mm

Electrical Requirements:

110/230 VAC, 50/60 Hz

Environment:

Temp Range 5°C to 40°C, humidity 90% non-condensing

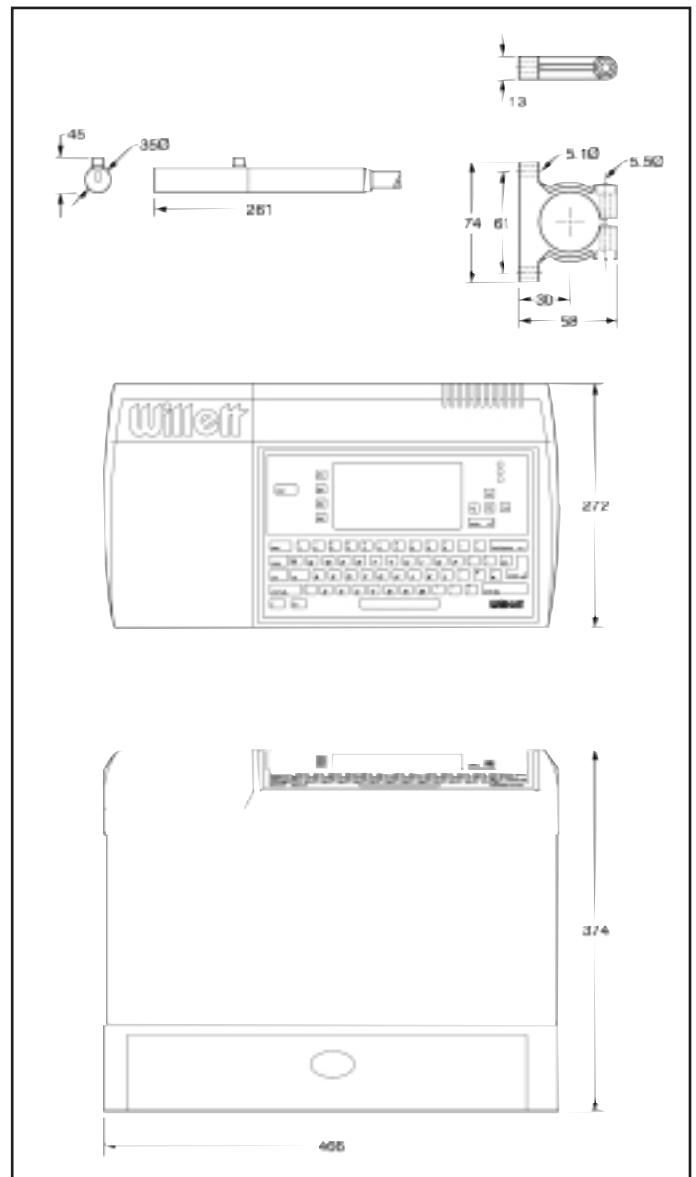

Inks:

A basic range of standard and low environmental impact inks are available for use in the 430

Data Input:

Shaft encoder
Print Trigger
